Methods and definitions

The **index of production in construction** approximates the evolution of the volume of production within the sector, broken down into building construction and civil engineering.

Seasonally adjusted euro area and EU series are calculated by aggregating the seasonally adjusted national data. Eurostat carries out the seasonal adjustment of the data for those countries that do not adjust their data for seasonal effects.

The monthly index as presented in this News Release is calculated only on the basis of the data of those countries reporting monthly data. Missing observations from Member States for recent months are estimated for the calculation of the euro area and the EU aggregates.

Revisions and timetable

Data of previous months have been revised compared with those issued in News Release [107/2021](#) of 17 September 2021. The monthly percentage change for July 2021 remained stable at +0.1% in the euro area and was revised from -0.1% to +0.1% in the EU. The annual percentage change has been revised from +3.3% to +3.5% in the euro area and from +3.8% to +4.3% in the EU.
